

Addendum to the SHOW Rulebook (effective April 8, 2026)

SHOW will now allow the use of the "pink" impression material, Equilox ACS Pink Hood Packing Putty (soft). The impression material cannot exceed a horizontal line from medial to lateral wall and should stay behind the apex of the frog (see diagram).

SHOW must be notified of any horse this material is being used on and a note from either the veterinarian or farrier caring for the horse must be on file with SHOW.

This allowance is a trial basis in 2026 and will be reevaluated for the 2027 show season.

SHOW reserves the right to pull any shoe on any entry that looks to display signs of pressure shoeing during the locomotion part of our inspection process.

If found to have been misused, the trainer would receive a five year suspension from SHOW affiliated events.
